Experience

Lewis Communications / Senior Web Developer

August 2017 - PRESENT, Brentwood, TN

Helped lead a team of developers, influenced internal coding standards and processes, and worked on client projects including developing a custom CMS using Laravel/Vue.js for a real-estate company.

Lewis Communications / Web Developer

October 2016 - August 2017, Franklin, TN

Built and maintained client projects using CraftCMS and ExpressionEngine with our in-house front-end framework.

Caddis Interactive / Junior Web Developer

July 2015 - October 2016, Franklin, TN

Built and maintained client projects with a generous helping of on-the-job learning.

—

Expertise

Technical

Comfortable in both front-end and back-end work. Most of my experience is with Laravel and Vue.js but I have spent time tinkering with many other frameworks like React, Svelte, Sails, Rails, Yii.

Mentorship

I believe mentorship is vital to the growth and sustainability of any team. The importance of fostering a learning environment is paramount to success and I love sharing what I've learned and learning from others, regardless of the topic.

Volunteer/Pro Bono Work

Bakers For Change - bakersforchange.org - Implementation and hosting
